

SIMLESA
Sustainable Intensification of Maize
and Legume Systems for Food
Security in Eastern and Southern Africa

What policy makers need to do to spread Conservation Agriculture-based Sustainable Intensification (CASI) to farmers

Mainstream CASI as a strategy in agricultural policy conversations, plans and budgets

Invest in the incubation and demand creation of mechanization custom hire services.

Strengthen CASI knowledge systems by investing in long term farm-based research trials, demonstrations, data collection, analysis and dissemination

Consider seed capital ventures to facilitate agribusinesses which are willing to invest in farmer education and value chain development

Enable the national extension system to support the establishment of agricultural innovation platforms
